JOSÉ M^a
COMPAGNI
Managing Director

Nowadays, companies in the elevator installation and maintenance industry cannot be managed as they were years ago. As circumstances have changed, so have the necessary capabilities and skills to compete in today's market.

The good news is that all companies are in the same situation, so it depends on them to adapt to the process of change, through a continuous training.

Addressed at executives who aim to position their companies as leaders in the elevator industry, the **Elevator Business Management Program** (EBM Program) is based on the most advanced management tools and techniques.

At **Docensas**, we want to facilitate access to quality training. That is why we offer a flexible methodology, with the versatility of enrolling in a 100% online or a blended format.

Besides, our modular structure allows our students to enroll separately in one or more modules and complete the program throughout the time needed.

The only conditions required are the ambition to improve and the effort necessary for every process of change.

Join now to the **Elevator Business Management Program**, a pioneer training initiative in the elevator industry.

DOCENSAS TRAINING ADVANTAGES

SPECIALIZATION

Unlike other training companies, instructors at **Docensas** have a wide field of experience in the elevator industry, including both business management and technical support and design. We are only and exclusively focused on training and it is very important for us to use the most suitable methods in each case.

FORMAT OPTIONS: ONLINE OR BLENDED

According to your ability to travel, you can follow the program 100% online or blended (online, with only a 3-days face-to-face lecture at the beginning of each module).

We count on our own technology to provide regular training without unnecessary transfers. It is easy to use and allows total mobility, since it can be used from your mobile phone.

AGILITY & EFFICIENCY

Making use of temporary or permanent subcontracting, **Docensas** offers the services of a committed training department, without incurring fixed costs, which favors efficiency and agility.

CUSTOMIZATION

Working under strict confidentiality rules, **Docensas** personnel will act as members of your own team, loyal, motivated and committed.

FLEXIBILITY

Docensas offers different services, depending on the needs of each company.

Enjoy a quality global training

always with you

PARTICIPANT PROFILE

PARTICIPANT PROFILE

EXECUTIVES

Elevator industry personnel exercising managerial functions or aspiring to.

At **Docensas**, we are fully aware of the reality that installation and maintenance companies are facing worldwide. We know how important it is, in terms of competitiveness and success, to count on qualified personnel.

From the elevator maintenance technician, to the managing director, all personnel must aspire to be leaders in their fields. That is the only way to create strong, sustainable-in-time companies.

The globalization phenomenon, the adaptation to technological innovations, the emergence of new competitors, the greater need of employees and clients: all of them are part of those new challenges which require a strategic reconsideration.

The experience gained throughout many years, along with the theoretical knowledge of the different disciplines, make the **Docensas** teaching team a perfect asset for all elevator, components and escalator manufacturers all over the world.

EBM
